**Drive Performance and Growth
with Scalable Solutions for
Midsize Companies**

The Best-Run Businesses Run SAP®

**Manage every aspect of your
business in “real, real time”**

Manage every aspect of your business in “real, real time”

For growing companies, success depends on the ability not only to **proactively manage sales, operations, and financial performance** but also to react and take advantage of changing customer, supplier, and business partner expectations and demands. But adopting industry-leading best practices is only part of the story. How do you unlock the true potential of your business?

You can meet these challenges and more with SAP® Business Suite 4 SAP HANA® (SAP S/4HANA), edition for SAP Business All-in-One. This edition covers end-to-end processes with expertise for 25 industries, localized for 62 countries. It provides midsize or quickly growing small companies with the enterprise resource planning (ERP) software required to manage sales growth, operational efficiency, and financial agility. You can gain an integrated view of your business, and this edition can

scale and adapt easily to meet your evolving business needs. SAP S/4HANA, edition for SAP Business All-in-One can help you run your business more efficiently, in line with industry-specific best practices and in real time.

With SAP S/4HANA, you can also benefit from smarter business innovations, faster business processes, and simpler business interactions. You can reduce your IT overhead through the efficiency of SAP HANA applications.

Highly scalable and innovative technology

Highly scalable and innovative technology

Manage sales, products, services, and operations

Improve financial management and business insight

Make a cost-effective investment with confidence

SAP S/4HANA, edition for SAP Business All-in-One is business software for the digital economy for small and midsize enterprises (SMEs).

The edition can be configured quickly to meet your current needs and changed as your needs evolve because it is based on SAP Best Practices packages. These packages feature preconfiguration, documentation, and a built-in methodology for quickly deploying integrated business functionality.

Although optimized for midsize or quickly growing smaller firms, your solution can grow

and scale along with your business. At any time, you can extend your solution with additional functionality for other business areas.

With a rich, unified, and personalized user environment featuring role-based navigation and an intuitive interface, SAP S/4HANA, edition for SAP Business All-in-One provides easy access to the business content your employees need to work efficiently. Because it can use the SAP HANA database, features built-in analytics, and works with Microsoft Excel, employees can make well-informed decisions quickly and perform ad hoc analysis and reporting as needed on operational data.

Manage sales, products, services, and operations

Highly scalable and innovative technology

Manage sales, products, services, and operations

Improve financial management and business insight

Make a cost-effective investment with confidence

With SAP S/4HANA, edition for SAP Business All-in-One, you can optimize your business and drive growth. You can streamline operations, enabling lean shop-floor operations for assembly and fabrication. You can also route tasks and approval requests automatically to improve efficiency. SAP S/4HANA, edition for SAP Business All-in-One lets you manage inbound and outbound logistics, workforce processes, employee talent, projects, portfolios, and compliance. It also provides alerts and

relevant information to employees based on their responsibilities to improve decision making.

Help your organization increase sales, profit margins, and customer satisfaction by automating the entire order-to-cash cycle. Deliver orders on time, accelerate sales processes, reduce operational costs, and boost productivity with SAP S/4HANA, edition for SAP Business All-in-One.

Grow and scale effectively by optimizing business processes and automating routine activities company-wide.

Improve financial management and business insight

Highly scalable and innovative technology

Manage sales, products, services, and operations

Improve financial management and business insight

Make a cost-effective investment with confidence

With SAP S/4HANA, edition for SAP Business All-in-One, you can accelerate financial closes, increase the accuracy of financial reporting, and maintain a set of balanced books reflecting any business dimension. Support for international and local accounting standards helps reduce the risk of noncompliance. You gain deeper insight into performance by analyzing revenue and cost information for customers, products, projects, and services. Overall, you can improve your management of internal controls, including documentation, assessment, and testing.

With tight integration between the different functional areas, SAP S/4HANA, edition for SAP Business All-in-One also helps eliminate redundant data entry and mismatched reporting. You gain insight into every aspect of the business, and you can quickly monitor performance, identify inefficiencies, and spot growth opportunities.

Subsidiaries of companies running the SAP ERP application at the corporate level can benefit from SAP S/4HANA, edition for SAP Business All-in-One. You can quickly and affordably integrate subsidiary operations with the corporate office for consistency and visibility. At the same time, the subsidiaries maintain the freedom they need to be agile and responsive to local business conditions and new market opportunities.

Take advantage of optimized business processes and incredible speed.

Innovate without disruption

Flexible and affordable, with predictable time to value

Take advantage of in-memory computing technology

Run smarter – SAP HANA enables true market differentiation by unlocking new growth opportunities, boosting competitiveness, and inventing new data-driven business models for increased market share. Imagine the increased effectiveness of your knowledge workers when they have real-time information about accounts payable and receivable. They can spend more time on higher-value activities and less time on clerical work.

Run faster – SAP HANA dramatically speeds up your core business processes for reduced operational costs, driving business at the speed of the market and boosting responsiveness. Removing the constraints of batch-driven processes enables processing and decision making to happen in the moment, dramatically changing the way you drive your business.

Run simpler – SAP HANA helps you simplify business processes with immediate insight to action for improved effectiveness, empowering people to decide and act in the business moment and boost productivity. Combining transactions and analysis in one single database enables simplification of IT, leading to lower costs and greater efficiency.
